

## UDG

### Universal Elongation Measuring Equipment with 6 test stations

for determining the static and permanent elongation of non-metallic planar fabrics according to group wide VW Standard PV 3909 and TL 52064.

#### Technical Data per test station:

Clamping length(Elongation length: 100 mm/200 mm  
change over to 200/400 mm

Measurement: static and permanent elongation  
with 2 separated measuring modules

Graduation: 0.01 mm/digital readout

Basic Load: 25 N built in

Additional load for: 50 N and 125 N  
by 4 mass pieces of 25 N each

Movement of load-steps: by motor / stepper motor

Lowering speed: 100 mm/min.

Timer

Dimensions:

LxWxH: 1707 mm x 410 mm x 759 mm

Height: (1155 mm height when measuring bolt above
